

**APPROVED INSTRUCTIONAL SOFTWARE LIST – (approved for purchase and installation)**

**NEW: Tablet apps** (iOS and Android) Approved for purchase. [Click here](#). (If link doesn't work, please scroll to end of document.)

The software titles listed here are packages known to be successful. The district will make every effort to provide technical support for these packages. However, **the district CANNOT support all instructional software available on the market.** Support decisions are made based on availability of trained technicians, network issues and time effectiveness for cost analysis. Questions concerning possible support should be directed to the Tech Support Annex and the PDC.

**Tech Contacts:** Please note that all software approved for Windows XP only has been removed. Newer version will need to be submitted for approval as above. Please submit the [63-11-53A Request for Installed Software](#) to Eric Englert **AND** a work order for Karen Harris to do the evaluation. Software or a link to an online demo version must be provided with the submission. Please note that interface drivers (i.e., for a wireless mouse, presentation pointer, camera, printer, art tablet) do not need to be approved, unless the software includes applications beyond the basic interface drivers.

Software and associated peripherals are sometimes purchased with good intent, but the technicians cannot make them work. In this case, schools will have to purchase vendor support or abandon the use of the item or software. Time and cost effectiveness of technical and software support for the district must be a consideration.

**The approved for purchase – but not necessarily supported – software list begins on the next page.**

**DISTRICT-SUPPORTED SOFTWARE**

The items listed (on this page, only) are supported by district software technicians. **The district CANNOT support all instructional software available on the market.** Support decisions are made based on availability of trained technicians, network issues and time effectiveness for cost analysis. Questions concerning possible support should be directed to the Tech Support Annex and the PDC.

Operating Systems:	MS Windows 7, Windows 10
	MS Windows Server 2008 - 2012
Internet Access:	MS Internet Explorer v.9-v.11, Microsoft Edge, Google Chrome
Security and Virus:	Microsoft System Center EndPoint Protection
	Technician Utilities supplied and approved of by Data Processing that prevent adware/spyware.
Production: <i>Microsoft products are the standard for our district.</i>	MS Office Professional 2007, 2010, 2013, 2016, 365 (Includes Access, Excel, Outlook, PowerPoint, Publisher, Word)
Media:	Follett Catalog and Circulation for Windows, Follett Destiny, FolletShelf, Mackenvia
Web Development: <i>Supported by District Webmaster</i>	Adobe DreamWeaver
	MS Expression Web v. 3 ,4
	MS FrontPage 2003
	MS SharePoint Designer
Integrated Curriculum Packages:	Accelerated Reader
	New Century (must purchase vendor support)
	Pearson Education SuccessMaker™ (incl. Enterprise edition)
	READ 180
	STAR Reading Assessment, Math, Math Assessment
	Scholastic Reading Counts
	Boxer Math Series

## OTHER SOFTWARE CONSIDERATIONS AND ISSUES

- ◆ The guidelines for software purchases have been set forth in the [Electronic Communication Policy](#). Schools should be aware of hardware requirements and instructional needs, and will obtain approval from the Professional Development Center/Data Processing prior to the purchase of any software. The district Network Software Analysts will support only software approved prior to purchase by the Director of Instructional Technology.
- ◆ Santa Rosa County District Schools resolved to support a single computer hardware/software platform, to provide feasible, reasonable, cost-effective repair and maintenance to the schools. The decision was made to provide this support to PCs running the Microsoft Windows platform. Therefore, the district does not recommend or provide support for Macs.
- ◆ Software and associated peripherals are sometimes purchased with good intent, but the technicians cannot make them work. In this case, schools will have to purchase vendor support or abandon the use of the item or software. Time and cost effectiveness of technical and software support for the district must be a consideration.
- ◆ As the district moves to new operating systems, it must be understood that some of the older software programs will not run on newer, more advanced systems. This is the nature of the industry and the district must make decisions based on advances in the available technology. Likewise, as new systems are developed and programs written specifically for them, often the older operating systems are incapable of handling the new software and eventually become obsolete.
- ◆ The Professional Development Center will attempt to provide facilities for training on the software products that reside on a majority of district systems. However, the PDC labs are not equipped with every software program and price, a priority consideration, may prohibit purchase of and training on a particular software application.
