- Fever >100.4 F (measured orally)
- Cough (worsening cough in those with chronic cough)
- Shortness of breath or difficulty breathing
- Sore throat
- Headache (moderate or severe)
- Body or muscle aches
- GI symptoms (abdominal pain, diarrhea, vomiting, nausea)
- New loss of taste or smell
- Nasal congestion, runny nose

No

Go to School

Yes

Stay home and do not go to school. Seek medical care and COVID-19 PCR or rapid Antigen testing. **IMPORTANT:** Rapid Antibody testing IS NOT ACCEPTED for diagnosis of COVID-19.

## Evaluation in a School Health Room

**STEP 1 -Child tells teacher of symptoms. Teacher notifies school health unit of child with possible COVID-related symptoms. Student reports to school health room for evaluation.**

### STEP 2: Evaluation in a School Health Room

Does the child have any of the following symptoms?

- Fever >100.4 F (measured orally)
- Cough (worsening cough in those with chronic cough)
- Shortness of breath or difficulty breathing
- Sore throat
- Headache (moderate or severe)
- Body or muscle aches
- GI symptoms (abdominal pain, diarrhea, vomiting)
- New loss of taste or smell
- Nasal congestion, runny nose

**YES**  
Meets school exclusion criteria. for COVID-19

- Isolate child from others.
- Inform parent.
- Send home.
- Recommend evaluation by health care provider and possible testing for COVID-19 (PCR or Rapid Antigen)

**No, asymptomatic**

**No, but has symptoms not related to COVID-19.**

Observe. Assess for more common ailments routinely observed in school-aged children.

**Symptoms Do Not Resolve**

Inform parent and consider sending home based on normal school exclusion policy.

**Symptoms Resolve**

**Return to Class Recommended Prevention Measures**
