TO: Next Year's Calculus Students  
FROM: J. Satterwhite, Calculus Teacher

Attached is a summer homework packet, which will be due the first day of Calculus class in August. The material in the packet should be material you learned in Algebra II and Precalculus.

You will turn in the packet the first day of Calculus class, and it will count as a daily grade. During the first week of school, you will take a test on the material in the packet.

My recommendation is that you look over the problems in the packet when you receive it but that you wait until the week before school starts to work the problems so that you will remember the material very well when school starts.

We will be using the TI-84 graphing calculator in Calculus. A TI-84 costs around $125. The price varies some so you should compare the prices at various places before purchasing one. You can buy a TI-84 at stores such as Target, Walmart, Best Buy, Office Depot, Office Max, and Staples, as well as from online sites like Amazon.

You will be expected to have a TI-84 the first week of school.

I am looking forward to seeing you in Calculus in August.
