

CHAPTER 8.00 - AUXILIARY SERVICES

RENOVATIONS OR REMODELING OF FACILITIES

8.51

- I. When recommending the preliminary school budget or any amendments thereto relating to capital outlay projects, the Superintendent may, after evaluation, recommend to the School Board that suitable projects costing two hundred thousand dollars (\$200,000.00) or less be provided on a day labor basis.

- II. Parent groups, school staff, and civic associations often raise funds to make improvements to various School Board facilities. Such changes are regulated by building codes, State Department of Education rules, School Board rules and Florida Statutes. In addition, these changes often have cost implications on maintenance, energy usage and inhibitions to future site construction. The change or addition always poses questions regarding Board liability for the facilities since any deviation from State Regulations would be a factor in a damage suit if the change in facility related to a personal injury. Written permission from the School District building code official must be obtained by the school principal for any school improvements by parent groups, school staff, and civic associations.

STATUTORY AUTHORITY: 1001.41, 1001.42, F.S.
